ABSTRACTED-PUB-NO: JP58159407A

BASIC-ABSTRACT:

Pharmacological activator compsn. comprises (III) contg. calcium salt (II) of acid cpd. Pref. (II) include calcium salts of dichlophenac, N-anilinophenyl acetic acid, indomethacin, N-phenylanthranilic acid, N-methylantranilic acid, N-acetylantranilic acid, anthranilic acid, salicylic acid, etc. These calcium salts accelerate rectal absorption and exhibit low hindrance to rectal musus. Pref. (III) include peptide polymers such as pepreomycin, insulin, lysozyme, etc.

Compsns. are prepd. in the form of common anal suppository or in the form of liq., suspension or ointment obtd. by dispersing in a liq. oily base packed in a soft capsule or placed in a tube for injection as necessary. Base is e.g. ground nut oil, olive oil, corn oil, castor oil, cacao butter, glycerin ester of fatty acid, etc.

ABSTRACTED-PUB-NO: JP05221875A

BASIC-ABSTRACT:

Compsn. comprises highly purified lysozyme or its salts, and contains avidin or degradation prod. of avidin in an electro-phoresis chart.

Lysozyme is pref. prepd. by dispersing egg white homogeneously in water at nearly neutral conditions, adsorbing lysozyme on weak acid cation exchange resin, eluting it in salts soln., and collecting lysozyme as crystals by salting. The salts of lysozyme are hydrochloride, carbonate, phosphate, hexametaphosphate, sulphate, glutamate, glycerophosphate and gluconate, esp. hydrochloride (lysozyme hydrochloride).

The comps. can be formulated into eye drops, injection, nasal drops, ear drops, suppositories, tablets, capsules, granules powder, liq. prepn. and cream, esp. eye drops.

USE/ADVANTAGE - The comps. has low antigenicity and causes no allergic symptoms. The

compsn. has antiinflammatory, anti- conjunctivit is, haemostasis and antiviral activities.
